SUMMARY

Motivated and detail-oriented Computer Science Engineering student with a strong foundation in web development and modern frontend technologies. Skilled in React.js, TypeScript, Python, Tailwind CSS, and Supabase, with hands-on experience building real-world applications such as a Smart Campus Complaint Portal. Passionate about solving practical problems through technology, continuously learning new tools, and contributing to innovative software development projects.

EDUCATION

PES College of Engineering, Mandya

2024 – 2028 (Expected)

Visvesvaraya Technological University (VTU), Belagavi

Bachelor of Engineering (B.E.) – Computer Science and Engineering

Mandya, Karnataka

STG PU College, Chinakurali, Pandavapura

2022 – 2024

Department of Pre-University Education (DPUE), Karnataka

Pre-University Course (PUC) – PCMB

Percentage: 96%

SET Public School, Melukote

2021 – 2022

Karnataka School Examination and Assessment Board (KSEAB)

Secondary School Leaving Certificate (SSLC)

Percentage: 91.2%

PROJECTS

Smart Campus Complaint Portal

Jul 2026 – Aug 2026

Objective: Designed and developed a web-based complaint management platform to simplify reporting, tracking, and resolving campus-related issues through a centralized digital system.

Technologies Used: React.js, TypeScript, Tailwind CSS, Supabase

Features: Implemented secure authentication, complaint submission with categories and image uploads, real-time status tracking, and role-based dashboards for students and administrators.

Problem Solved: Eliminated manual complaint handling by providing a transparent platform that enables faster issue reporting, monitoring, and resolution across the campus.

Contribution: Designed the application architecture, developed responsive frontend components, integrated Supabase for authentication and database management, and implemented complaint workflow and status management.

Expected Impact: Expected to reduce complaint resolution time, improve communication between students and administrators, and enhance overall campus service efficiency.
